

April 18, 1973

only unicameral legislature in the United States. Now then, we have, I believe, Senator Whitney's motion before the body regarding LB 311. Senator Whitney.

SENATOR WHITNEY: Mr. President, members of the Legislature, at the moment I am going to ask that we advance LB 311 just as it is without the amendments which was in the Journal or which is in the book and on this bases, then, it would not have any fiscal impact and the reason for this is that the bill has been bracketed for some time with the thought of having an amendment and with that fiscal impact. But at this time, I wish to advance without the fiscal impact. Now, the reason for the bill in the first place was because of an Attorney General's opinion. The Legislature had intended that the local communities through tax sources and private sources only put up 40% in relation to the state putting up 60%, but the Attorney General's opinion said that the law was not written that way. That the 40% would have to apply to even federal funds and so, this bill as it is written with no amendments would exclude federal funds and it would make it possible, then, for these mental retarded units to use federal funds and that was the original intent of Stahmer's motion the other day was to take care of such bills as this, therefore, I move it be advanced to Enrollment and Review.

PRESIDENT: Is there any further discussion, now, of the motion. Senator Kennedy

SENATOR KENNEDY: I listened as Senator Whitney explained this and I wonder if it isn't possible to do the same on 302. The relationship is the same and if we could take the fiscal impact out of 302 and carry it on through for the same reasoning, if there isn't any objections.

PRESIDENT: Senator Moylan.

SENATOR MOYLAN: Mr. President and members of the Legislature, I would object to advancing 302 at this time because there are...there have been several people over the regions contacted me that they would like to have more time to study this bill and they are preparing some amendments which I believe should be considered on LB 302. So, I would object to advancing 302 at this time.

PRESIDENT: Well, strictly speaking, LB 302 is not before us, of course, at this time at all and Senator Kennedy was, I believe, attempting to raise it along or move it along with 311 but the chair isn't going to consider that until somebody makes a motion, so we are still just discussing LB 311 and that was raised by Senator Whitney, of course, on unanimous consent here to take the bill up. Now, if that doesn't happen, if somebody objects to hearing.. or taking up 311 at this time without the fiscal or the "A" bill on it, why that ends it right there and there will have to be a vote taken as to whether we then go ahead and consider the bill or not. If the vote isn't successful, why we go back to General..excuse me, to Final Reading, which, of course, where the agenda..where we are expected to be. Senator Cal Carsten, are you objecting to the motion, the unanimous consent motion that was made by Senator Whitney.

SENATOR CAL CARSTEN: Yes sir, Mr. President, I think we are getting out of our line of order. I don't think we should be discussing General File bills at the moment. We should be on Final Reading and I object.

PRESIDENT: Thank you. There is objection, then. Senator Whitney will have to move. Senator Whitney.

SENATOR WHITNEY: Mr. President, there are some people who
